Office Action Summary

Application No.

10/575,151

Applicant(s)

SCHMETZER, DIETMAR

Examiner

James R. Bidwell

Art Unit

3651

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 April 2006.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

5) ☐ Notice of Informal Patent Application
6) ☐ Other: _____

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the movable stop of claims 12 and 13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3651

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 and 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hunter (U.S. Patent 5,127,209).

Hunter shows a transfer device 36, a serializing device 10, a row of compartments 34 and each compartment is configured to accommodate at least one product.

Re claim 2, the speed of device 36 is fully controllable.

Re claim 3, there is a velocity component along the compartments direction of travel.

Re claim 4, a constant rate of travel is disclosed.

Re claim 5, the receptacles change their shape.

Re claim 6, shown is a pair of sidewalls 24.

Re claim 7, the angle changes.

Re claim 8, shown is a circulating conveyor 12.

Re claim 9, a pulley causes a bend.

Re claim 10, the belt 12 serves as a stop.

Re claim 11, where the articles contact the belt is a fixed location.

Re claim 14, the compartments are formed by pairs of walls.

Re claim 15, the compartment is opened while being loaded then closed after loading.

Re claim 16, the trailing wall is tilted.

Re claim 17, shown is a circulating conveyor 12.

Re claim 18, the conveyor 12 is deflected in order to tilt the walls 24.

Claims 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hopkins (U.S. Patent 4,223,779) shows a fixed stop 40. The remaining cited patents show transfer devices feeding to compartmented serializing devices.
